RN

Bachelor of Science Degree in Nursing

Kentucky Career Center

I am a registered nurse with a Bachelor of Science degree in nursing. The WIA program was the best fit for me, and it pretty much paid for full tuition for the last two semesters of my nursing program and gave me some money to take the state boards and some money for uniforms.

Now that I have my degree and am actually working, I have a comfortable living. I just bought a brand-new car; out on my own. So, everything fell into place once I got my degree and passed my boards. So, I mean, it was a tremendous, tremendous opportunity that was afforded to me.

The Kentucky Career Center program helped me become successful by giving me a career counselor. I mean, I knew what it was I wanted to do. The career counselor helped me get on track to graduate.

It's never too late to start. If you even remotely have an interest in anything, pursue it. Pursue what's going to make you happy.
